TriTech™

TriTech™, a 3-ply reinforced material with a polyester mesh-core encased in two layers of laminated PVC, that offers superior strength and durability. This premium grade, above ground pool material, can withstand extreme conditions including exposure to ultraviolet rays and chlorine, plus it's stress-tested against the weight and strain of large volumes of water.

Ozone Generator

The Hydro-Force™ Clear Water Pool System generates ozone and is virtually maintenance-free requiring only dry air to operate efficiently.

Nano-Bubble Generator

What makes the Hydro-Force™ Clear Water Pool System so advanced is the high concentration of ozone released into the water by our patented Nano-Bubbles generator. Nano-Bubbles are so small (1/10th the diameter of a human hair) they remain submerged for up to an hour, compared to a normal bubble which rises in seconds. This dramatically increases the amount of ozone which is released into the pool water. By using the Nano-Bubbles generator the purifying power of ozone is dynamically increased.

Better For The Environment
Ozone is a naturally occurring powerful oxidizer
Ozone changes back to oxygen after its cleaning process is complete
No by-products left in the water to harm the environment when the pool is drained

Just Add Salt And Say Goodbye To Pool Chemicals
Working with common table salt, the Hydro-Force™ Flowclear Chlorinator makes pool maintenance easy by eliminating the need for pool chemicals and providing swimmers with clean, clear pool water that doesn't irritate their skin or burn their eyes. By adding common table salt or sodium chloride to swimming pool water, the Hydro-Force™ Flowclear Chlorinator is able to separate the salt into the two basic elements of sodium and chloride. As part of the daily filtration cycle, pool water passes through the chlorinator's electrolytic cell producing chlorine that instantly dissolves into the water, which destroys bacteria and algae on contact and oxidizes other organic materials.

Advantage
• The affordable, compact system to clean your Above Ground Pool. It is healthier for swimmers, saves money and is better for the environment.

• Use Nature's powerful sanitizer, Ozone, to clean your Above Ground Pool.

Saves You Money
• Will reduce heavy chemical usage (depends on outdoor temperature and amount of bodily impurities that are introduced to the pool).

Better For The Environment
• Ozone is a naturally-occurring powerful oxidizer.
• No by-products left in the water to harm the environment when the pool is drained.

Ozone
Kills Bacteria, Viruses and Mold in Pools

The Bestway Hydro-Force Sand Filter now ships with an integrated Ozonator. Sand filtration has long been the gold standard of swimming pool water filtration, while ozonation is renowned for water purification and the environmental benefits from the reduced use of pool chemicals. By combining sand filtration with ozonation, swimming pool water is sure to be clean, clear and totally refreshing.

- Durable, corrosion-proof filter tank
- 6-position valve for easy control
- Top flange clamp design allows 360 degree rotation for easy installation
- Easy-to-read pressure gauge
- Strainer for separating leaves and other rough debris
- Provides clean and clear swimming pool water
- Ozone output: 150 mg/h
- Easy-access assembly makes service simple

- Package also includes adaptors for pool valves with an outer diameter of 32mm (1.25")
- Compatible with most above ground pools
- Includes a bottle of pool & spa test strips
- Sand not included
- **Required sand size: #20 silica sand, 0.45-0.85mm, approximately 25kg**
- Free DVD included
- For use with 1,100-33,300 L (300-8,800 gallons) pools
